

ALISHA FATIMA

AI Engineer & Developer

aishafatima2758@gmail.com | [linkedin.com/in/thealisha-fatima](https://www.linkedin.com/in/thealisha-fatima) | github.com/AlishaFatima16 | Khanewal, Pakistan

AI undergraduate at UET Lahore with hands-on experience building real-world AI systems across NLP, multi-agent architectures, and LLM-powered applications. Proven track record in competitive hackathons (LUMS Top 8/65, Harvard CS50 Puzzle Day Winner, HEC GenAI) and production internship experience. Passionate about agentic AI, intelligent automation, and solving high-impact problems.

EDUCATION

B.Sc. Artificial Intelligence	<i>Expected 2029</i>
University of Engineering & Technology (UET), Lahore	
Intermediate — Computer Science	<i>Score: 1024 / 1200</i>
Matriculation — Medical Sciences	<i>Score: 1024 / 1100</i>

TECHNICAL SKILLS

Languages	Python, C++,C, JS
AI / ML	NLP (NER, Text Classification), LLM Integration, Prompt Engineering, RAG, Information Extraction, Multi-Agent Systems
Frameworks	FastAPI, React Native, Expo
AI Tools	Ollama, n8n, Cursor, Lovable, Perplexity AI, Android Studio
Infrastructure	Git, GitHub, Docker, Google Cloud Run (GCP), PostgreSQL, Vercel
Concepts	Multi-Agent Orchestration, Workflow Automation, API Development, AI Deployment (Cloud & Local), Data Pipelines, System Design

EXPERIENCE

AI / ML Intern · Olyxee	<i>2026 – Present</i>
<i>Contributing to Olyxee Cortex — Enterprise Cognition Infrastructure</i>	
- Built Named Entity Recognition (NER) pipelines for structured extraction from unstructured enterprise documents, improving data consistency and accuracy - Contributed to design and development of organizational memory graphs, procedural + temporal reasoning modules, and multi-agent orchestration systems - Involved in workflow integrity validation systems for production-grade AI infrastructure	

- Worked in a production-like environment on applied ML tasks and system optimization

PROJECTS

CIRO — Crisis Intelligence & Response Orchestrator | *Python · FastAPI · React Native · PostgreSQL · Docker · GCP*

- Built an AI-powered civic emergency response system for detecting and simulating urban crises (flooding, smog, traffic) in Lahore
- Designed multi-agent workflow architecture using a Detector → Planner → Executor pipeline with real-time mobile dashboard
- Deployed on Google Cloud Run with Docker; contributed to system strategy, architecture planning, and technical documentation
- Delivered as a 5-member team in a fast-paced 3-day hackathon sprint

Inbox Copilot | *AI Email Intelligence System*

- Developed AI-based email parsing and classification system with urgency and opportunity detection logic
- Built student–opportunity matching engine with skill-gap analysis and personalized recommendation output

AgriAssist | *Multimodal AI · NLP · Computer Vision | HEC Generative AI Hackathon (Cohort-2)*

- Built multimodal AI system for crop disease detection from images + text input in both Urdu and English
- Implemented visual disease classification and recommendation engine for treatment and farming guidance
- Competed among 170+ teams in a 72-hour sprint

AI Resume Analyzer | *NLP · Python*

- Built ATS-style resume scoring system with skill extraction, job matching logic, and structured improvement recommendations

Ollama LLM Chatbot | *Ollama · Local LLM*

- Integrated Ollama for local LLM inference; built conversational AI assistant with optimized low-latency response pipeline

Spectra AI | *In Progress — Domain-specific chemical knowledge AI*

- Developing domain-specific AI system for chemical knowledge analysis; working on dataset preparation and structured reasoning models

Nexperiment | *GPT · Vercel*

- Built and deployed a GPT-powered experimental AI web application exploring prompt-based AI behavior; hosted on Vercel

ACHIEVEMENTS & RECOGNITION

- **LUMS Hackathon Finalist** — Top 8 out of 65 teams — full-stack AI solution under tight deadline
- **Harvard University CS50 Puzzle Day** — Winner — algorithmic problem-solving excellence
- **Aspire Leaders Program Scholar** — Globally competitive leadership development program
- **Code in Place — Stanford University** — Selected for competitive global CS program (problem-solving focus)
- **HEC Generative AI Hackathon (Cohort-2)** — Built AgriAssist among 170+ competing teams in 72-hour sprint
- **HackNation Global Hackathon** — AI-based solution development in international competition
- **FAST Softtech Hackathon** — Industry-level software engineering exposure
- **lablab.ai — NovaAI Trading Agent Hackathon** — Volunteer contributor; agentic AI workflow design
- **Vice President — School Leadership** — Elected leadership and coordination responsibility
- **National Painting Competition** — 3rd Position (Pakistan) — national-level creative achievement
- **District & Tehsil Debating Competitions** — Winner — communication & argumentation

WORKSHOPS & TECHNICAL EVENTS

- **Build with AI Workshop #7** — GDG Cloud Lahore at InvoZone: practical AI workflows, cloud deployment, and offline AI systems using Google Gemma models
- **Build with AI 2026** — National Incubation Center Lahore: AI-powered startup development, agentic workflows, APIs, and rapid MVP building
- **LUMS Tech Seminar: startups, career growth, and industry expectations in tech** — adaptability, problem-solving, real-world execution
- **PyShop Workshop & Competition** — IEEE UET Lahore: creative + technical problem-solving in a collaborative setting
